19. Google states the following: Google uses a tiered network to deliver content to its users. The core of the network is Google's data centers which provide computation and backend storage. The next tier of Google's network infrastructure is known as "Edge Points of Presence" ("PoPs"), which connect Google's network to the rest of the internet. The last tier of the network is the "Google Global Cache" ("GGC") servers or "edge nodes." GGC servers are off-the-shelf computers hosted in the facilities of a local Internet Service Provider ("ISP"), at the request of the ISP. If an ISP chooses to host a GGC server, then a copy of portions of certain digital content that is popular with the ISP's subscribers—say, parts of a popular YouTube video—can be temporarily stored or "cached" on the GGC server. As a result, content requested by an end user can be fetched from the GGC within the ISPs network, so the request does not use long haul capacity to do so. GGC servers, though, are not necessary for the delivery of Google content. Google denies any remaining allegations in this paragraph.

20. To the extent the allegations in paragraph 20 purport to describe or quote one or more documents or webpages, Google states that those documents or webpages are the best source of their full content and context. As a

result, content requested by an end user can be fetched from the GGC within the ISPs network, so the request does not use long haul capacity to do so. GGC servers, though, are not necessary for the delivery of Google content. Google denies any remaining allegations in this paragraph.

21. Google states that, if an ISP chooses to host a GGC server and a copy of portions of certain digital content is temporarily stored or “cached” on the GGC server, content requested by an end user can be fetched from the GGC within the ISPs network, so the request does not use long haul capacity to do so. GGC servers, though, are not necessary for the delivery of Google content. Google denies any remaining allegations in this paragraph.

GGC servers, though, are not necessary for the delivery of Google content. Google admits that some GGC servers are hosted by ISPs in the Western District of Texas. RESPONSE TO PLAINTIFF'S DEMAND FOR JURY TRIAL

Google admits that Plaintiff demands a trial by jury, and Google likewise demands a trial by jury on all issues so triable.

RESPONSE TO PLAINTIFF'S REQUEST FOR RELIEF

Google denies the underlying allegations of Plaintiff's Prayer for Relief against Google, denies that Plaintiff is entitled to any relief whatsoever, and requests that the Court deny all relief to Plaintiff, enter judgment in favor of Google, and award Google its attorneys' fees as the prevailing party in the action.

GOOGLE'S AFFIRMATIVE DEFENSES

Google's affirmative defenses are provided below. Google further reserves the right to amend this Answer to add affirmative defenses, including allegations of inequitable conduct, and/or any other defenses currently unknown to Google, as they become known throughout the course of this action. Assertion of a defense is not a concession that Google has the burden of proving the matter asserted.

FIRST AFFIRMATIVE DEFENSE – NON-INFRINGEMENT

1. Plaintiff is not entitled to any relief against Google because Google does not and has not directly or indirectly infringed, either literally or under the doctrine of equivalents, any valid and enforceable claim of the '961 patent.

SECOND AFFIRMATIVE DEFENSE – INVALIDITY

1. Each and every asserted claim of the '961 patent is invalid for failure to meet the requirements of Title 35, United States Code, including but not limited to, 35 U.S.C. §§ 101, 102, 103, and/or 112 thereof, and the rules, regulations, and laws pertaining thereto, and/or obviousness type double patenting.

REQUEST FOR RELIEF

WHEREFORE, Google respectfully requests that the Court:

- (A) Enter judgment that Google does not infringe any claims of the '961 patent literally and/or under the doctrine of equivalents;
- (B) Enter judgment that the '961 patent is invalid;
- (C) Declare that this case is not exceptional pursuant to 35 U.S.C. §285; and
- (D) Award Google its costs, disbursements, attorneys' fees, and such further and additional relief as is deemed appropriate by this Court.
